

pseudo code.

Name: PAWAN JANA

Reg No: 192472313.

1. write pseudocode for financial application that convert an integer amount in indian Rupee to us Dollar using a floating point. exchange rate.

BEGIN

DECLARE Rupee AS INTEGER

DECLARE ExchangeRate AS FLOAT

DECLARE Dollar AS FLOAT

Display

"Currency conversion system"

Display "

Enter the amount in indian Rupee: "

input Rupee

Display "Enter current exchange rate "

Display " (1 us Dollar = ? indian Rupee) : "

input ExchangeRate.

Dollar $\leftarrow$ Rupee / ExchangeRate

Display "Amount in indian Rupee: ", Rupee

Display "Exchange Rate: ", ExchangeRate

Display "Amount in us Dollar: ", Dollar

END.

2. A factory records the daily production of a machine, write C++ pseudocode to calculate the total production using a loop.

BEGIN

DECLARE N, i , production,

total production AS INTEGER

SET total production $\leftarrow 0$

DISPLAY "production monitoring system"

DISPLAY "enter number of machines: "

input N

for $i \leftarrow 1$ to N DO

DISPLAY "enter the production of machine", i

input production

total production $\leftarrow$ total production + production

DISPLAY "number of machines: ", N

DISPLAY "total production: ",

total production

DISPLAY "production calculation completed

successfully."

END.

3. write pseudo-code for a company that declares an employee as "Eligible for incentive" if performance score is 80 or above ; otherwise , "not eligible".

BEGIN

DECLARE SCORE AS INTEGER

DECLARE Result AS STRING

Display " Employee performance Evaluation"

Display " Enter the employee performance score : "

input score

if score $\geq$ 80 THEN

Result $\leftarrow$ "Eligible for incentive"

ELSE

Result $\leftarrow$ "not eligible"

END IF

Display " performance score : ", score

Display " Employee Status : ", result

Display " Thank you"

END.

4. A bank approves a loan if customer's annual income is ₹ 5,00,000 or above. Write C++ pseudocode to determine whether the applicant is eligible.

BEGIN

DECLARE AnnualIncome AS INTEGER

DECLARE Status AS STRING

Display " LOAN APPROVAL SYSTEM "

Display " Enter the customer's annual income ! "

INPUT AnnualIncome

IF AnnualIncome $\geq$ 500000 THEN

Status $\leftarrow$ " eligible for loan "

ELSE

Status $\leftarrow$ " not eligible for loan "

END IF

Display " Annual income : ", AnnualIncome

Display " Loan status : ", Status

Display " thank you "

END.

5. Write pseudocode for a sensor that records a temperature value as a floating point number. Convert into an integer value for storage using explicit type casting.

BEGIN

DECLARE Temperature AS FLOAT

DECLARE storedTemperature AS INTEGER

DISPLAY "INDUSTRIAL SENSOR DATA processing"

DISPLAY "Enter the Temperature value: "

INPUT Temperature

storedTemperature ← INTEGER(Temperature)

DISPLAY "Temperature Recorded: ",

Temperature

DISPLAY "stored integer value: ",

storedTemperature

DISPLAY "Data processing completed"

END.
